SUMMARY

Myself Arun Vignesh V, a BCA student at VISTAS, committed to continuous learning and growth in the dynamic field of technology. With a long-term goal of building a strong foundation in web development, I actively pursue relevant courses and certifications to enhance my skills. I thrive on challenges, try to excel in problem- solving, and am dedicated to developing innovative solutions.

EDUCATION

Bachelors of Computer Applications (General)

August 2024 - Present

Vels Institutue of Science, Technology and Advanced Studies

EXPERIENCE

- **Programming Languages:** JavaScript, TypeScript, Python, C, C++, Java, HTML/CSS.
- **Frameworks & Libraries:** React Native, Flutter, Node.js, Next.js, TensorFlow, PyTorch, OpenCV, Three.js.
- **Languages:** English, Tamil, Hindi.

Products and Prototypes:

1) Track My Academy

- Live site: <http://www.trackmyacademy.com>
- Designed and developed a scalable sports academy management website
- Implemented role-based dashboards for academies, coaches, and players
- Built responsive, user-friendly UI with performance optimization
- Integrated core features for operations, tracking, and engagement
- Ensured production-ready deployment and ongoing enhancements

2) Marina Digitals

- Live site: <http://www.marinadigi.com>
 - Developed client-focused digital web solutions
 - Built responsive and scalable websites
 - Delivered SEO-optimized frontend interfaces
 - Implemented performance and UI enhancements
 - Supported production deployments and maintenance
-

Freelancing and Own Projects:

1) Aqua Arch International

- Live Site: <https://aquaarchinternational.com>
- Designed and developed a modern responsive corporate website for an international architecture and engineering brand.
- Built using React, TypeScript, and Tailwind CSS with a clean UI/UX and optimized performance.
- Implemented scalable frontend architecture with mobile-first responsiveness and seamless cross-device compatibility.

2) Fufies - Soft Toys E-Commerce

- Live Site: <https://www.fufies.in/>
- Designed and developed a responsive e-commerce website for a soft plushies and toys brand.
- Built to handle product listings, collections, and customer engagement for Fufies.
- Optimized for performance and mobile-first user experience.
- Deployed and maintained the live production website at fufies.in.

3) Kyra's Elite - Clothing E-Commerce

- Live Site: <https://www.kyraelite.com/>
- Designed and developed a modern, high-performance e-commerce website for a premium clothing and accessories brand.
- Built using React, TypeScript, and Tailwind CSS for a responsive and scalable frontend architecture.
- Implemented clean UI/UX with smooth navigation, optimizing the user journey from discovery to checkout.

4) Selva's Art Haus - Bridal Beautician

- Live Site: <https://selvasarthaus.netlify.app/>
 - Designed and developed a responsive, visually engaging website for an art-focused brand showcasing artworks and events.
 - Built using React, Framer and Tailwind CSS with responsive design for cross-device compatibility.
 - Collaborated closely with the client to align the website with their creative vision.
-

Personal Projects:

1) Hand Cricket : A Gesture-Controlled Web Game

- **Live Site:** handcricket.arunvignesh.one
 - **Developed and deployed a browser-based interactive AI Hand Cricket game that detects hand gestures to simulate traditional hand cricket gameplay.**
 - Built using React.js, MediaPipe, and TensorFlow.js for real-time finger gesture recognition and game logic execution.
 - Implemented smooth, responsive UI with Framer Motion and styled components for enhanced user experience.
 - Enhanced accessibility by eliminating the need for physical controllers — just use your fingers and a webcam to play.
 - Demonstrates the intersection of AI, web technologies, and user interaction in a creative, nostalgic game format.
-
